

COLLECTION OF RELATIONS

1. Get ready for the game: Cut out the cards, one by one and keep this strip with the instructions.

2. Actions (choose and write): Before entering in the exhibition write down an action on the back of each card: to write, to draw, to mimic, to ask a question, to guess, to read lips...

The images can be used as inspiration or a starting point to choose the actions creating relations. For the moment the actions should only be written but not realized.

3. Relations: Already at the exhibition, the cards start to be activated, construction of the Collection of Relations starts when the cards are activated.

To activate a card is to select and relate it with one or more artworks in the gallery(ies) and involve the whole family.

4. Relations in Action: The member of the family who activates a card gives the other members a clue on which works(s) are in his/her view related with the card he/she choose.

5. Debate: Talk about the relation(s) that family found, opening a debate where agreeing or disagreeing, allow to confirm relations and find others.

* The game card can be activated more than once.

*More activated cards you have, the biggest will your Collections of Relations be.

*These instructions can and should be changed in family, in a way to improve the game or create a new one.

Tip: To increase your collection, use the Portuguese version of the Family Guide.
